

Course contents:

## Indoor Climate

1. Indoor climate
  - 1.1 Introduction
  - 1.2 Climate factors
  - 1.3 Bioclimate and health
  - 1.4 About the development of buildings
  
2. Indoor temperature
  - 2.1 Physiological considerations
  - 2.2 Thermal conduction and surface temperature
  - 2.3 Windows and indoor climate
  - 2.4 Optimum indoor air temperature
  
3. Indoor humidity
  - 3.1 Indoor humidity and health
  - 3.2 What affects indoor humidity?
  - 3.3 How are air humidity, thermal insulation, wall moisture, and mold contamination connected?
  
4. Heating climate
  
5. Ventilation
  - 5.1 Ventilation and health
  - 5.2 Fresh air requirements of indoor spaces
  - 5.3 Types of ventilation
    - 5.3.1 Sample calculations of ventilation requirements
    - 5.3.2 Controlled ventilation
    - 5.3.3 Air conditioning
  - Summary of ventilation types
  
6. Building materials
