

Eco-Wise is a partner of the IBN which is a counselling centre located in Amsterdam. Sharing the Building Biology knowledge of creating harmony between nature and buildings is the goal for Eco-Wise. The more people become aware of the importance of healthy buildings, the better it is for planet Earth.

Eco-Wise, is already an IBN counselling centre a few years. It offers building professionals and anyone who is looking for a healthy and environmentally friendly living and working environment independent and objectively comprehensible information, training, advice and measurements. [Mold, bacteria, chemicals and elektrosmog]

As an IBN partner, Eco-Wise offers you the Building Biology Consultant Course IBN in English or in German. Eco-Wise is the point of contact for Dutch students for questions about the course. We also provide complementary seminars and lectures about Building Biology.
